WHO YOU WOULD BE BUYING FROM

We run it before we sell it

Future Life Technologies builds and runs business software. The platform in this brochure is the one Future Life Group's own network of 434 accredited centres across 17 countries runs on every working day — the same platform we install, brand and hand to other businesses. We are not selling you something we demo. We are selling you something we depend on.

WHEN THE PRODUCT IS NOT THE ANSWER

What we do

Eight capabilities, and the services under each.

AI & Automation

AI in production, not on a slide

AI automation built by a team that runs AI in production across 19 modules — content generation, voice and call intelligence, document extraction, marking, chatbots and …

Managed Services & BPO

The team that runs it, so you do not have to hire one

Managed services and BPO: customer support, back office, IT helpdesk, finance and admin teams — running on the same platform we build, with the work measurable.

- ERP & CRM Implementation

`lapt.uk/managed-services/`

Technology Advisory

An honest second opinion, including when the answer is 'do not …

Technology advisory: architecture review, build-versus-buy, vendor assessment, security and data review, and a costed roadmap — from a team that also builds.

`lapt.uk/technology-advisory/`

NO SURPRISES LATER

What it costs

Priced per user, the way you already buy software — except one licence here replaces the WhatsApp tool, the phone system, the CRM, the signing service and the billing package. Compare it against the sum of those bills, not against any one of them.

PLAN	PRICE	WHAT IT COVERS
Starter	**₹999 /user/month**	Official WhatsApp shared inbox and the Lead & Sales CRM. Everything to catch an enquiry, own it and chase it. Minimum five users.
Growth	**₹2,499 /user/month**	Adds the Cloud Call Centre, Proposals & e-Signature and Marketing & Attribution — less per person than a phone system alone costs elsewhere, with four more systems in it.
Complete	**₹3,999 /user/month**	All twelve products, including invoicing and real double-entry books, the learning platform, examinations, certificates and payroll.
Own Cloud	**₹6,00,000 /year**	The complete platform in your own cloud account or on your own servers, with unlimited users, your own domain and certificates, and priority support.

- Per user per month, billed annually, excluding GST. Minimum five users. Monthly billing is available at 20% more.
- Your data is yours alone — kept apart from every other customer and never visible to them. Own Cloud adds your own installation and your own database, on your own domain.
- WhatsApp, telephony, domains, hosting and storage are billed at our published rates, metered per account, and you see the estimate before every campaign — one bill for everything instead of five suppliers to chase.
- Own Cloud becomes the cheaper option at 50 users on Starter, 20 on Growth and 13 on Complete — we will tell you when you cross that line rather than wait for you to notice.
- A written quote against your own numbers, and a walkthrough on the live system, before you commit to anything.

Talk to us

Tell us what you run today and where it hurts. A person reads it and replies — normally the same working day. A first conversation costs nothing, and nothing is installed to see the system running.
